## Products

Stoneballs create bold focal points and provide the perfect contrast to plants, shrubs, trees and lawns.

They can be used effectively to define spaces, highlight patios, courtyards, gravel and other paved areas.

They provide harmony of form and style to your garden and the gradual ageing process ensures a distinctive antique finish. Also used for restoration of gateways and walls and as interior decoration. Whether your garden is large and landscaped, designed as a small outdoor extension to a town house - dramatic or tranquil – our stoneballs can help complete your sense of place.

## Colours

Colours come in a wide range - from pale grey through to sand.

Some have wonderful striations running through.

As they are crafted from solid stone the colours are formed by nature with slight variations throughout the stone.

Compared with cast, composite concrete 'stone', our natural sandstone is far superior in quality, appearance and durability.

Let us know your preferences and we will match up your requirements.

## 'Antique' balls

As our stone balls are from natural stone and not cast or composite, they will develop a beautiful patina readily and naturally, particularly if the balls are placed in a damp, exposed place.

If you prefer the stone to remain bright and clean this is easily achieved by annual cleaning or an initial application of a sealer.

However, if you wish to have an 'antique' effect immediately, we specialise in creating balls with an 'antique' patina which will give an instant aged effect to your garden. Please specify if you require this finish when ordering.
